No. 44-80

TITLE/SIGNIFICANCE:

SOVIET MOBILE WATER FILTRATION STATION

COMMENT:

Mobile filtration stations for the recovery and purification of water have been identified with the Soviet ground forces in Afghanistan. Each mobile filtration station consists of a mobile filter/pump vehicle (van truck), a support trailer, and storage and settling tanks. When operationally deployed the sides of the truck are expanded, the storage and settling tanks are inflated, and the truck, tanks, the support trailer and a water supply point are connected by hoses.
